

# This is the One

## IDEXX Catalyst One™

- The One **that delivers complete diagnostic chemistry information in minutes**
- The One **that lets you practice better medicine**
- The One **that is accurate and reliable**
- The One **that is easy to use**
- The One **that offers reference-lab quality in-clinic**

Increase your in-house testing or diagnostic capability with an advanced menu:

### **Electrolytes**

Lyte 4 CLIP includes Na, K and Cl, calculates and reports Na/K Ratio with each sample

### **Fructosamine**

Accurately monitor fructosamine levels for the confident management of diabetes in dogs and cats

### **Urine P:C Ratio**

Two tests in one run help you detect and quantify proteinuria and diagnose early renal disease

### **Phenobarbital**

Accurately measure your patients Phenobarbital levels in minutes for monitoring and timely adjustments during patient visits

### **Total T<sub>4</sub>**

Easily screen, diagnose and manage thyroid disease for dogs: 6.4-128.7 nmol/L; for cats: 6.4-257.4 nmol/L.

**In one run, with one sample, the Catalyst One™ Analyzer delivers chemistry and electrolyte results in only 8 minutes and total T<sub>4</sub> in as little as 15 minutes, for real-time patient insight.**
